12 - What constructive suggestions do you have for improving this course?

- nothing that i know of
- I had a problem with the grading of various discussion boards and chapter exercises. It seemed as though the professor graded based on prewritten responses and did not give full credit for effectively answering the question. For example, if a certain word or phrase was omitted in the response then there was a deduction of points even though the answer could have been fully correct and explained the concept correctly. Felt that was a bit unnecessary given that we should be understanding the concepts being taught instead of learning how to regurgitate information
- Could provide more feedback on the assignments?
- I would like to see due dates added to the modules just so I do not have to go back and forth to the calendar.
- n/a

13 - Other comments?

- relevant and informational course
- Overall, it was a great class where I learned a lot and I really appreciated the release of all material at the beginning of the course so I could work ahead at my own pace - not a lot of professors allow that but it is the best for me.
- Great course overall!

14 - The instructor was well prepared for the course.
